Link(Port 27-28)	Green on: The port is connected with 1000Mbps speed Blinking: Data transmission Off: Port disconnected
Reset	Hold for >5 sec. to restore factory default

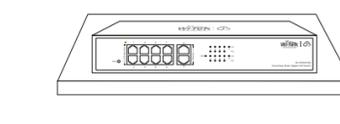

3. Installation

• Desktop Installation

Step1: Attach the mats to the bottom four corners of the switch.

Step2: Place the switch horizontally on the desktop.

• Rack-mount Installation

• Log in to the switch locally

Let the Switch obtain an IP address and then check the DHCP server to see which IP address was assigned. The Switch is set to DHCP by default, so it will try to obtain an IP address automatically. If that fails, then it will use the default fallback IP address, 192.168.0.1

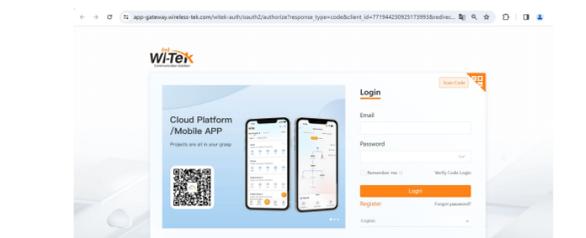

To log in, follow these steps:

1. Launch your web browser. Type the appropriate IP address in the address field.
2. The login screen will appear. In the factory state, the first login requires setting an account and password.

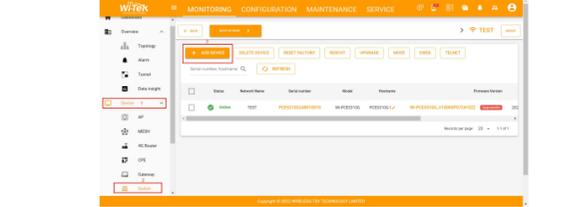

• Cloud login switch configuration

1. Log in to the cloud management page (No account, you need to register an account to log in, The URL is <http://cloud2.wireless-tek.com>)

2. Enter the cloud binding switch

(Explain: The switch must be connected to the internet to bind successfully)

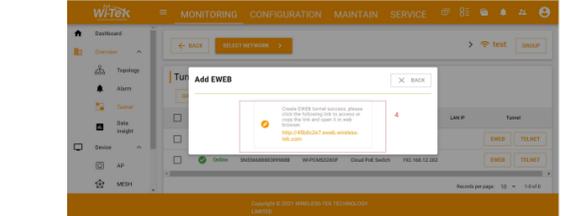

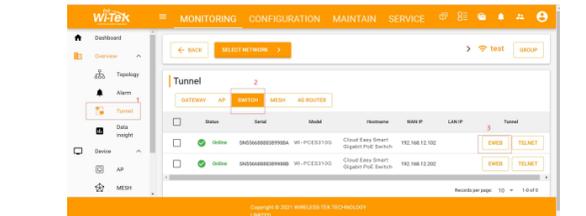

Please enter the device serial number and the last six hexes of the device MAC address to bind a device to the current group, device can be off when binding.

(Explain: The 17-digit SN code and MAC address of the switch are shown on the sticker on the back of the switch as shown in the figure below)

3. After binding, you can use the Switch in the Tunnel option in the cloud management, and then use EWEB to enter the switch.

(The EWEB tunnel can be created only when the easy smart switch is linked with the other type of Wi-Tek cloud management device, such as cloud L2, L3 management switch, gateway, wireless AP, etc.)
