

G2 WiFi Gateway

Plug-and-Play Customer Satisfaction

The Mimosa G2 Gateway is an elegant and compact WiFi gateway that simplifies in-home managed broadband delivery. Designed to easily install directly into a wall plug, the G2 also provides integrated POE for powering Mimosa C5 client premise devices. The cloud-managed G2 is designed to extend the managed broadband infrastructure all the way to the subscriber's mobile and fixed WiFi devices.

WiFi Gateway

BEAUTIFULLY POWERFUL

Seamlessly fitting into any decor, it eliminates multiple devices and messy extension cords

CLOUD MANAGED

Maintains visibility into the critical components required to keep internet service up and running

PLUG-AND-PLAY

Easily fill coverage holes by adding additional G2 gateways; Auto-setup quickly pairs with the master G2 to easily extend WiFi coverage

FULLY INTEGRATED ROUTER

Includes a NAT router, stateful packet inspection firewall, port forwarding and static routes

INTELLIGENT SPECTRUM MANAGEMENT

Selects the best channel on startup and uses an ongoing auto-channel algorithm to avoid interference for best performance

SECURE GUEST NETWORKS

Create up to four entirely separate, secured wireless networks for privacy

SEAMLESS INTEGRATION

Supports PPPoE and PPTP tunneling to easily integrate into existing service provider infrastructure for authentication and control
